CORNER HILL AND MORRISH ROADS

Just 1 Mile South of Swartz Creek

Greetings for 1949: And many thanks to all "Glad Fans" and friends for your orders, inquiries, etc., during 1948. Another year has rolled by and again every possible effort is being made to get this modest listing out to you before the holidays. No jobbers list will be issued.

A word about policy.—Again let me reiterate. Needless ballyhoo, fantastic bombast or buncombe as to size or other attributes, tricky psychology and all kinds of high pressure selling methods are definitely OUT. It is my fixed intention to stick closely to plain facts; to make no use of expensive advertising frills, wasteful, of both your money and mine. To price originations within reason — with the realization that while each honest breeder feels sure that every one of his releases will find a place in the Glad Hall of Fame very, very few actually do. And lastly not to spend countless hours and all that it entails nurturing specimens to unnatural or rather unusual or extraordinary growth for the sole purpose of collecting a drawer full of blue ribbons in competition with the very people expected to purchase my stock.

IN THE FIELD LAST SEASON

Micharlotte came through here again with flying colors, had spikes of it, also of Burma and of Big Top that gave more square inches of coverage than I've ever seen before anywhere. Succeeded in getting some very nice color shots. The grand champion blooms, on points and all around performance however, were spikes of Phantom Beauty. Golden Arrow was swell and the florists here went overboard for Elizabeth the Queen. Patrician proved itself to be a very healthy grower but did not bloom from large enough bulbs to do itself justice on a comparison basis. We had a fairly good growing season here with the usual ups and downs but most of the commercials did very well; old Phylis McQuiston doing especially well, also Parnassus and Burma stood out conspicuously in the field.

GUARANTEE

Stock guaranteed to be free from disease and insects at the time of shipment, State inspected both in field and storage, thrifty and true to name.

Occasional errors are humanly possible, therefore, if any of the bulbs shall be found not as represented I will replace them, together with something extra to compensate for disappointments; or refund your money; BUT in no case will I be held responsible beyond the actual purchase price of the bulbs. Fine exhibition blooms are the result of a combination of superior heredity with perfect environment during growth; as I have no control over cultural treatment, fertility, climatic conditions, etc. No guarantee as to final results can be given however, great care has been taken to insure each bulb being clean, vigorous and true to name, ready under the proper conditions to produce for you some truly magnificent blossoms.

TERMS

Cash or C.O.D. shipment if preferred. Please do not order for less than \$1 as the sorting, packing and postage make such orders unprofitable. Extra counts in proportion to the earliness and the size of the order. As stock of most varieties is strictly limited, early ordering will insure better selections and avoid disappointments, and I will show my appreciation with more liberal overcount and often a bulb or two of the newer and more expensive sorts.

CULTURE

Do not plant Gladiolus too near buildings, trees or shrubbery. Plant larger size bulbs not less than 6 inches apart either in rows or in beds for maximum results, if in rows, the rows should be not less than eighteen inches apart. Plant six inches deep in light soils or three inches deep in heavy soils. The better the ground is prepared and the more plant food applied (preferably well rotted manure, cow manure if available) well mixed in, the fall before planting if possible, the finer your blooms will be, provided you cultivate frequently and plenty of water is forthcoming especially when they are spiking.

THRIPS

These tiny creatures will if once established, ruin your blooms no matter how well grown. Some people have grown Gladioli for years without being bothered by this pest, but they are simply fortunate. Don't take chances, start with clean bulbs, treat before planting and spray regularly during growth. If your bulbs are at all diseased, I recommend corrosive sublimate treatment before planting in the spring, one ounce to seven gallons of warm water as a solution in which to soak the corms overnight.

Now about varieties. Remember it costs just as much time, money and labor to raise an out-dated, worthless variety as it does to raise a good one. Why not get rid of the worthless ones and get started with the better sorts, adding a few of the newer ones each year. Many of the older ones are still tops, but some are being replaced each year by better ones to keep your garden up to date, try as many new ones as you can find room and time for.

COLOR TRANSPARENCIES

We have some nice ones of Micharlotte and several coming seedlings, also Phantom Beauty, Golden Arrow and others including views of fields, which we shall be glad to send to responsible interested parties for projection or viewing. They show relative values better than can be done with any word description.

PRICE LIST

MICHARLOTTE (Tunias Triump X Picardy)—Light flame red with narrow frosted edge on petals, formal type, very large wide open flirets five to six open three showing color. A good rugged red that gives lots of bulblets. Priced where every one can afford to try out this fine gorgeous red.

LARGE-----75c ea. MED.-----50c SMALL-----30c BULBLETS-----5c ea. \$4.00 per 100

Do not be deceived by this price: Micharlotte will hold its own, in its color class with any glad now on the market regardless of price. Mr. Loubris of Massachusetts took two blues with it at Boston Show in 1947, the only time it has been exhibited on the show bench. My stock does not run into thousands but several hundred, while they last go at these prices. Micharlotte can also be obtained from Mr. Gaston Loubris, Wakefield, Mass., and from Mr. Milford Johnson, Dell Gardens, Canton, Minn.
